

If you are currently using one of the templates from the Dynamic Agent Template series, you're already set up to begin adding social media buttons to your agent website. Simply follow instructions under step 1 of this document and your website will be updated automatically!

If you want to start taking advantage of the Dynamic Agent Template series and incorporate the social media features, complete both steps 1 & 2 to change your current agent template.

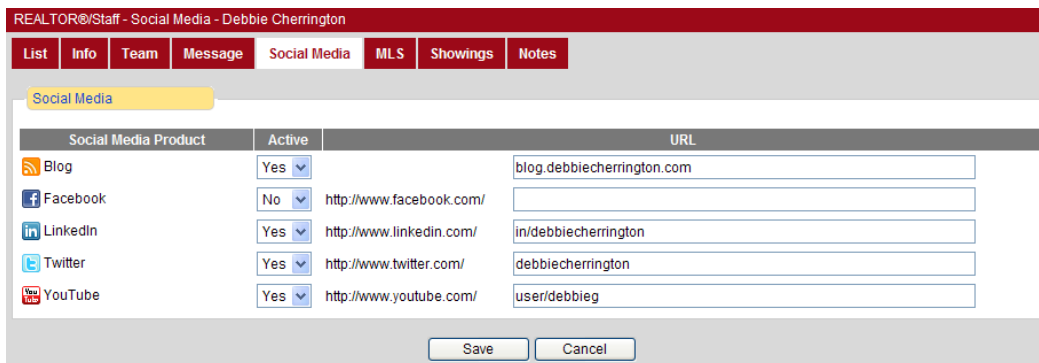

1. Adding your social media accounts

- a) Log into the system and hover over the **Admin** menu and select **My Profile**.

- b) Select the **Social Media** tab.

- c) Enter the path for each of your social accounts and flip the **Active** switch to **Yes**. See example below:

Social Media Product	Active	URL
Blog	Yes	blog.debbieherrington.com
Facebook	No	http://www.facebook.com/
LinkedIn	Yes	http://www.linkedin.com/in/debbieherrington
Twitter	Yes	http://www.twitter.com/debbieherrington
YouTube	Yes	http://www.youtube.com/user/debbieg

Save Cancel

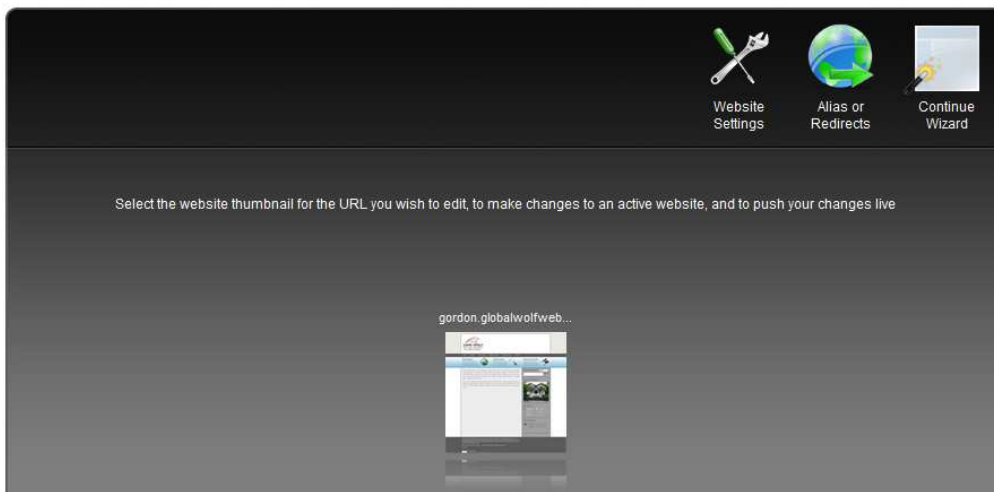

- d) As always, hit **SAVE**, you're done! The social media buttons you have added will now display on your website.

2. Choosing a social media template

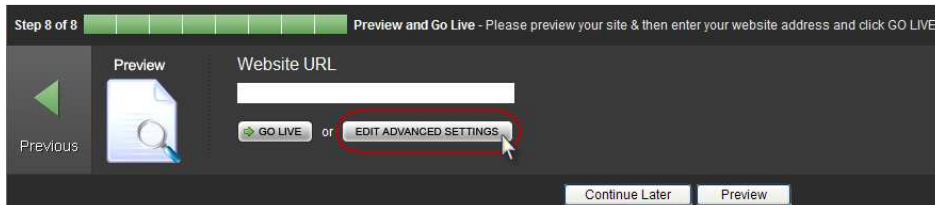

a) Select **Web Manager**

b) If your website is live, click on the website thumbnail icon in the middle of the screen and proceed to step d) of these instructions or if you are working on building your website and it is not live yet, click the **Continue Wizard** menu in the top right corner and proceed to step c).

c) Go to Step 8 of 8 in the wizard and click the **Edit Advanced Settings** button.

d) Click the blue **Navigation Menus** option and then click **Select Template** button.

e) Preview all of the Dynamic Agent Templates available in the system and select one.

f) After you've selected a Dynamic Agent Template, push the **Go Live** button in the top right corner to make changes take effect.
