## Royal LePage corporate offices switch to Lone Wolf Software

Effective January 1<sup>st</sup>, 2003, Royal LePage corporate offices began processing their real estate transactions, agent billing and accounts payable through the Lone Wolf Realty Management System.

Royal LePage made the switch from their existing DOS product to Lone Wolf after an extensive review of the marketplace. "We had a detailed needs analysis that several vendors were asked to quote on. We concluded that the Lone Wolf Realty Management System was the program best suited to our corporate brokerage's needs. We are glad to switch to Lone Wolf." said Michelle Lin, Director of Finance, Brokerage Operations.

"We have had great relations with a number of Royal LePage Associate brokers for years and this opportunity to provide our management system to the head office is a fantastic achievement for Lone Wolf" said Lorne C. Wallace C.A. President. "With this installation, transactional data for over half of the Royal LePage agents across the country will be processed by Lone Wolf and we are looking forward to the opportunity to increase our market share with the other associate brokers."

ON BEHALF OF THE BOARD:

Lorne C. Wallace C.A.  
President
