Lone Wolf Integrates with Instanet Solutions® for Auto-population from Transaction Files and Forms

Cambridge, ON and AUSTIN, TX – February 21, 2008– Lone Wolf and Instanet Solutions™ announced today that they have integrated Lone Wolf's brokerage management system, the Realty Management System (RMS), with Instanet Solution's productivity suite including InstanetForms™, DocBox™ and TransactionDesk™.

This integration will allow users of RMS to pre-populate RMS transaction files from InstanetForms™ and TransactionDesk™. This removes the need for brokerage staff to re-enter already available data such as property address, transaction principles (buyers, sellers, agents, etc), dates, list and sales prices, etc. This pre-population will provide brokers who use both platforms a substantial time savings. Additionally, because both Lone Wolf and Instanet Solutions™ integrate with many MLS and public record sources, in many cases no one in the brokerage will ever need to type in the property address and other primary information when creating or managing a listing or sale file.

"It is gratifying to be able to provide our customers with very real time savings," says Joe Kazzoun, Vice President of Business and Product Development at Instanet Solutions™. "We now see data flowing from the MLS, to our forms and contracts database and then on to the RMS back office system. This is the true end to end solution our industry has been seeking for so long."

"We're pleased that this integration helps us towards the goal of a true enterprise solution for the real estate industry," says Lorne Wallace, President of Lone Wolf Real Estate Technologies. "With over 3,200 offices using our products, anything that can streamline processing time and cut costs is a benefit to them."

About Lone Wolf: As the industries #1 leader in real estate software and solutions, Lone Wolf Real Estate Technologies offers a complete suite of systems for real estate brokerages. The Realty Management System (RMS) is Lone Wolf's flagship program, providing a fully integrated accounting and management program for the broker/owner. Lone Wolf also offers a robust web-based front office, Wolf EX with MLS integration, showings solution, messaging and much more.
