

ListHub will Power Listing Distribution for Lone Wolf Customers

Morgantown, WV – December 3, 2008 - Threewide Corporation and Lone Wolf Real Estate Technologies announced today that ListHub Listing Asset Management System will be the chosen listing distribution platform for Lone Wolf customers nationwide. The alliance between Lone Wolf and ListHub will provide Lone Wolf's customers with access to the nation's largest listing management network as well as ListHub's suite of reporting products.

"Lone Wolf is committed to bringing our brokerage customers an end-to-end solution comprised of only best-in-class products," said Lorne Wallace, President of Lone Wolf. "Rather than adding a basic syndication service for our customers, we decided to integrate with the solution that we identified with the broadest network, the most flexibility, and the most advanced metrics and reporting. With that in mind, we selected ListHub as our provider."

By engaging ListHub, brokers with the Global Wolf Office & Agent web site solutions will be able to leverage the power of ListHub distribution and the flexibility of the system to drive large volumes of consumer traffic directly to their Global Wolf website.

"We are excited to serve Lone Wolf's brokerage customers through our new alliance," said Luke Glass, President of Threewide Corporation. "Our companies share a dedication to sound technology, deep integration, and quality service. Together we will make sure that our mutual customers are prepared to compete in the digital age with extraordinary online marketing intelligence and reporting."

Plans have been made to build a strong integration between the Global Wolf website solution and ListHub. This integration will be the first of its kind, allowing brokers to reliably track the results from their online listing advertisement from lead to close.
