CAMBRIDGE, ON (April 21, 2011) – Lone Wolf Real Estate Technologies, the North American leader for real estate software solutions, is pleased to announce making the Branham300 under the group’s Top 250 list of Canadian Technology Companies. For nearly 20 years, the Branham300 has highlighted the top Canadian and Multinational ICT companies operating in Canada, as ranked by revenues. It illustrates the depth and breadth of innovative technologies developed in Canada and is widely considered to be a leading source of intelligence on Canada's ICT industry. The Branham300 list consists of the following major categories:

- Top 250 Canadian ICT Companies
- The Next 50 Canadian ICT Companies
- Top 25 ICT Multinational Companies operating in Canada
- Top 25 Up and Comer ICT Companies (category ranked on innovation/not revenue)

This is the first year Lone Wolf Real Estate Technologies has been recognized in the annual ranking and it placed in the top 175 out of thousands of ICT companies across Canada. “We are very excited to have our name placed alongside some of the leaders in technology not only in Canada but on the international stage as well. For over 20 years we have continually enhanced our product offerings to meet the ever changing needs of the real estate community and being recognized by the Branham300 is validation we are on the right path.” Says Lorne Wallace, CEO of Lone Wolf Real Estate Technologies.

The modest growth that Canada’s ICT elite experienced in 2010 is a positive indicator that the Canadian ICT industry is on the road to recovery. However, with cumulative Branham300 revenues still trailing 2008 levels, the industry’s resurgence is still a work in progress. Lone Wolf has shown it’s resiliency over the economic and ICT industry downturn. They have forged ahead acquiring national competitors and launching 3 new divisions to grow and maintain their position as the North American leader in real estate software, services, and solutions.

About Lone Wolf Real Estate Technologies
